

Write the Spanish numbers for the following in the spaces provided.

|    |               |
|----|---------------|
| 1. | Factors of 18 |
|    |               |
|    |               |
|    |               |
|    |               |
|    |               |

|    |               |
|----|---------------|
| 2. | Factors of 33 |
|    |               |
|    |               |
|    |               |

|    |                             |
|----|-----------------------------|
| 3. | multiples of 5 from 5 to 30 |
|    |                             |
|    |                             |
|    |                             |
|    |                             |

|    |                             |
|----|-----------------------------|
| 4. | Multiples of 12, from 12-72 |
|    |                             |
|    |                             |
|    |                             |
|    |                             |
|    |                             |

|    |              |
|----|--------------|
| 5. | Factors of 9 |
|    |              |
|    |              |
|    |              |

|    |                                     |
|----|-------------------------------------|
| 6. | All numbers counting down from 20-0 |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |
|    |                                     |

|    |                            |
|----|----------------------------|
| 7. | Multiples of 11 from 11-66 |
|    |                            |
|    |                            |
|    |                            |
|    |                            |

|             |  |
|-------------|--|
| 8.          | The solution to the following problems |
|             | $2 \times 2.5 =$                       |
|             | $15 + 30 =$                            |
|             | $6 \times 6 =$                         |
|             | $100 + 99 =$                           |
|             | $200 - 50 =$                           |
| $20 - 20 =$ |  |

|     |                          |
|-----|--------------------------|
| 9.  | All of the numbers below |
|     | 150                      |
|     | 1                        |
|     | 7                        |
|     | 9                        |
